

## MACFAB

### PB 500 Vertical Baler

The PB 500 baler is an excellent option for businesses with a large volumes of cardboard and plastic film. The compaction cylinders of the PB500 are mounted on the sides of the baler meaning this machine has a low operation height of 2.249 meters, perfect for stores with low ceiling heights. This baler has as an auto compaction cycle as standard, key locked E-stop with reset button, hour counter to monitor servicing and includes a safe strap bale eject system for easy removal of bales onto a pallet.

#### FEATURES

- Produces quality mill size bale.
- Auto control panel with bale full light and E-stop with locking key
- Dual cylinders for even compaction of waste material.
- Auto bale strap eject for easy bale removal.

**NOTE:** We have a range of strapping and wire available for this machine.

#### TECHNICAL INFORMATION

|                                  |                        |
|----------------------------------|------------------------|
| Power Supply:                    | 380 - 400 Volt 3 phase |
| Motor:                           | 11 kW 32 Amp           |
| Pressing Force:                  | Up to 50 Ton           |
| Noise Level:                     | 68 decibels            |
| Cycle time when idle empty:      | 35 s                   |
| Loading aperture width x height: | 1350 x 679 mm          |
| Width x Depth x Height:          | 2041 x 1350 x 2249 mm  |
| Weight:                          | 2100 kg                |

#### BALE INFORMATION

|                          |                                    |
|--------------------------|------------------------------------|
| Length x Width x Height: | 800 x 1400 x 1100 mm               |
| Weight:                  | 500kg (depending on material used) |
